PROFESSIONAL SUMMARY

Backend-focused Python Developer with hands-on experience building and deploying production web applications for UAE-based clients. Skilled in Python, Django, Django REST Framework, REST APIs, PostgreSQL, MySQL, authentication, database design, and cloud deployment. Experienced across requirements gathering, backend development, testing, deployment, debugging, and post-launch support.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, C++, HTML5, CSS3

Backend: Django, Django REST Framework (DRF), REST APIs, Authentication & Authorization, Session Management, Form Validation

Databases: PostgreSQL, MySQL, SQLite, Database Design & Optimization SQL .

Data: Pandas, NumPy , Matplotlib, Seaborn ..

Cloud & DevOps: Docker, Render, Cloudinary, WhiteNoise, Kubernetes ,HTTPS, Environment Variables, Production Deployment

Tools: Git, GitHub, VS Code, Postman, API Testing, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Web Development Intern — Plasmid | *Oct 2024 – Dec 2024*

• Engineered Python/Django backend modules with authentication and session management for secure multi-user workflows.

• Designed and optimized MySQL schemas and resolved production-level bugs to improve data integrity, query performance, and application stability.

• Collaborated using Git/GitHub for version control, code review, and iterative feature delivery within an agile workflow.

PROJECTS

Bab Al Sabarr Transport — Production Logistics Management System | *UAE-based Client* | *Live in Production*

Tech Stack: Python, Django, PostgreSQL, Cloudinary, Render, JavaScript, PWA, SMTP

• Designed, developed, and deployed a production logistics platform for a UAE transport company, supporting real trip submissions.

• Built a mobile-first PWA driver portal for trip data, container photos, and electronic receipts.

• Developed secure Cloudinary-based file upload/validation workflows and customized Django Admin with search, filtering, and CSV/Excel/PDF exports.

• Automated monthly audit exports combining Excel reports, photos, and receipts into structured ZIP archives.

• Integrated SMTP notifications, custom domain/HTTPS, secured environment variables, and production deployment.

• Diagnosed production timeout issues affecting large audit exports and provided post-launch support.

Meesaq Al Amanah — Corporate Business Website | *UAE-based Client* | *Live*

Tech Stack: Python, Django, Bootstrap, JavaScript, Render

• Designed and deployed the corporate website for a UAE-based sourcing and procurement company.

• Built reusable Django templates, responsive interfaces, SEO-friendly markup, and metadata for improved discoverability.

• Configured Render production deployment, custom domain, HTTPS, and performance improvements.

• Worked directly with business stakeholders to translate requirements into iterative technical releases.

Placement Cell Portal — Academic Project | *Academic Project*

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

• Developed backend modules for job listings and application tracking.

• Implemented role-based access for students, recruiters, and administrators.

• Built an admin dashboard for managing job posts and applications.

EDUCATION

Bachelor of Computer Applications (BCA) | Integral University, Lucknow | 2021 – 2024

CGPA: 7.90 — First Division with Honours
